

About This Document

Reported MCQs include data structures and CS/OOP fundamentals alongside the data-science topics.

Data Structures & CS Fundamentals

8 practice questions. Correct option highlighted; authenticity label shown under each answer.

Q1. Which data structure follows FIFO?

(A) Stack

(B) Queue ✓

(C) Tree

(D) Graph

Answer: (B) Queue

Authenticity: Community Reported

Q2. Which data structure follows LIFO?

(A) Queue

(B) Stack ✓

(C) Array

(D) Heap

Answer: (B) Stack

Authenticity: Community Reported

Q3. Average time complexity of hash table lookup:

(A) $O(1)$ ✓

(B) $O(n)$

(C) $O(\log n)$

(D) $O(n \log n)$

Answer: (A) $O(1)$

Authenticity: Community Reported

Q4. Binary search runs in:

(A) $O(n)$

(B) $O(\log n)$ ✓

(C) $O(n \log n)$

(D) $O(1)$

Answer: (B) $O(\log n)$

Authenticity: Frequently Repeated

Q5. Inorder traversal of a BST gives:

(A) Reverse order

(B) Sorted order ✓

(C) Random order

(D) Level order

Answer: (B) Sorted order

Authenticity: Community Reported

Q6. The four pillars of OOP are encapsulation, abstraction, inheritance and:

(A) Compilation

(B) Polymorphism ✓

(C) Recursion

(D) Iteration

Answer: (B) Polymorphism

Authenticity: Community Reported

Q7. A primary key in a relational table must be:

(A) Nullable

(B) Unique and not null ✓

(C) Foreign

(D) Indexed only

Answer: (B) Unique and not null

Authenticity: Community Reported

Q8. Which sorting algorithm is stable with $O(n \log n)$ worst case?

(A) Quick sort

(B) Merge sort ✓

(C) Selection sort

(D) Bubble sort

Answer: (B) Merge sort

Authenticity: Community Reported

Authenticity Legend & How to Read This Document

Every question and problem in this document is labelled with an **authenticity classification** so you know how closely it maps to what candidates have actually reported. Labels are assigned conservatively based on research; authored practice questions are never presented as real exam questions.

Label	Meaning
Verified Previous-Year	The specific problem/pattern is documented from actual reported assessment experiences.
Frequently Repeated	The topic or pattern type is documented as recurring across multiple hiring cycles.
Community Reported	A widely shared, role-relevant pattern reported across placement communities and forums.
Research-Backed Company Style	Authored to match the researched difficulty, style and pattern - practice, not a real past question.

The correct option in every MCQ is highlighted in green and also restated below the question. Study the pattern, not just the answer.
